

Welcome to Our Industrial Solutions

Advanced PMS, EMS & Industrial Automation

About Us

- - Production Management System (PMS)
- - Energy Management System (EMS)
- - Custom IoT & Embedded solutions
- - Industrial Automation & Electrical Solutions
- - PLC Programming, Panel Building & Custom Solutions
- Powersupply / Control devies

Production Management System (PMS)

Unlock the future of manufacturing with our cutting-edge Industry 4.0 solution, designed for seamless integration across all industries, including garments, manual production, press shops, CNC, and more. With real-time monitoring, A powerful analytics, and cloud & on-premises connectivity, it tracks part count, rejection count with reasons, idle time with causes, OEE, operator performance, machine efficiency, and more—maximizing productivity and minimizing downtime. Experience unmatched control, data-driven insights, and next-level efficiency with our feature-rich, high-performance system.

Energy Management System (EMS)

Maximize Efficiency, Minimize Costs – Smart Energy Optimization for Industries, Hospitals & Institutions.

- Real-time Energy Intelligence for proactive management
- Audit-Ready Reports for seamless compliance
- AI-Driven Cost Optimization to reduce waste
- Customizable Monitoring & Insights for total control

Empower your facility with next-gen energy efficiency, precision tracking, and actionable insights—because every watt counts!

Custom IoT & Embedded solutions

Tailor-Made IoT & Embedded Solutions for Every Industry!

We design and develop custom IoT, IIoT, and embedded systems to meet your industry's unique needs. From smart automation to real-time data intelligence, our solutions enhance efficiency, reliability, and performance. With cutting-edge hardware, firmware, and seamless connectivity, we bring innovation to life. Transform your operations with intelligent, future-ready technology!

Our Industrial Products

Temperature & Pressure Indicators – Precision-engineered sensors delivering real-time monitoring and accurate measurements for industrial applications.

Industrial Battery Chargers – High-efficiency, rugged chargers designed for continuous power reliability in demanding environments.

Surge Protection Devices – Advanced protection systems safeguarding industrial equipment from voltage spikes and electrical surges.

SMPS, PLC, HMI Solutions – Smart power management, automation, and intuitive control for optimized industrial operations. PLC programming services.

Electrical Panel Building & Custom Solutions – Tailor-made, high-performance electrical panels ensuring safety, efficiency, and seamless integration.
